

Email Blast

Through Biocompare, life scientists request to receive product information, event, e-seminar announcements, and promotions via email from third parties. Advertisers can promote their products in an exclusive email message to this extremely targeted email list as a low-cost, efficient, and effective way to reach their target audience.

Features

- Highest quality list in the industry
- Targeted to reach over 33+ areas of scientific interest
- Segmented by geographic region and country
- Work with you to ensure the Email Blast achieves the optimal layout
- Provide a detailed report after the delivery of the Email Blast
- Bounceback rate of 0.00%-0.01%

Email Blast Categories Available for Targeting

- | | | | |
|-----------------------|--------------------------------|-------------------------|--------------------------|
| • Antibodies | • Flow Cytometry | • Microarray Technology | • Protein Expression |
| • Bioprocess | • General Laboratory Equipment | • Microbiology | • Proteomics |
| • Cancer Research | • Genomics | • Molecular Biology | • qPCR/Real-Time PCR |
| • Cell/Tissue Culture | • High-Throughput Screening | • Neurobiology | • RNAi |
| • Cell Biology | • Imaging/Microscopy | • Nucleic Acid Analysis | • RNAi Technologies |
| • Cell Signaling | • Immunoassays | • Nucleic Acid Delivery | • Robotics/Automation |
| • Chromatography | • Mass Spectrometry | • PCR | • Software |
| • Cloning | | • Plant Biology | • Stem Cell Technologies |
| • Drug Discovery | | • Protein Biochemistry | |
